

Cold Storage's NAS Operating System - StorageZone Received Good Software Certification from TTA

Quality Operating System Designed for NAS Environment

April 22, 2008, Singapore - Cold Storage Software Pte Ltd. ("Cold Storage"), a subsidiary of Asia Media Systems (AMS), is pleased to announce that its Network Attached Storage (NAS) Operating System, StorageZone has been accredited the **Good Software Certification** by the Telecommunications Technology Association (TTA).

"We are proud of being one of the few NAS operating systems achieving the Good Software Certification" said Mr. Dominic Mak, Managing Director of Cold Storage. "Only 3% of the applicants pass the stringent certification process in their first attempt, we are proud to be one of those. It usually takes a four to five rounds for a product to get the certification. It is a testimony that our product development process is well designed and our pursuit of excellence."

TTA is a leading organization engages in IT standardization as well as providing testing and certification for IT products. The Good Software Certification specifies that the software had met the requirements as specified in the Quality Certification Standards of Software (MIC Notification 2000-81, 2000.10.31) as enforced by the Enforcement Ordinance Article 10-3 of the Software Industry Development Act. TTA adopts a series of parameters and measures to test the functionalities of StorageZone and reviews the quality of the software in accordance with the relevant regulations and TTA standards and issues this mark to qualified software.

StorageZone OS is the NAS operating system embedded in all Cold Storage NAS products. Developed by Cold Storage, the StorageZone OS is specially designed for the I/O performance demanding multimedia applications such as IPTV and digital video services. In addition to the comprehensive management console, StorageZone OS equipped with a variety of high availability and data resiliency features that can lower operation costs and enhance business continuity. Together with StorageZone OS, Cold Storage NAS products offer the right storage solution for the blooming multimedia applications.

"We will continuous our efforts in improving our product quality and functionality and demonstrate our commitment to provide the best products to our customers", Mr. Mak added.

About Cold Storage

Cold Storage is forerunning solution provider specializes in developing advanced network attached storage (NAS) solution for cold multimedia content and archived data. Combining proven experience NAS system deployment and strong customer focus, Cold Storage offers the right data storage solution that can provide the highest performance, help lower infrastructure investment and cost of ownership, improve service reliability and simplify system management.
